

Dear colleagues!

Organizing committee of the 27th International Conference on Finite and Infinite Dimensional Complex and Applications analysis informs you that the event will be held in Krasnoyarsk, Russian Federation on 12-16th of August, 2019 and invites mathematicians working towards complex analysis and related topics to participate and give a talk.

The conference continues the series of annual conferences started in Korea, 1993. For more than 20 years it has been one of the most significant conferences covering various topics of complex analysis. Until now it was hosted by prominent mathematical centers in Japan, Korea and China. 27th ICFIDCAA is organized in Krasnoyarsk, the city placed at the central part of Eurasia, which emphasizes the conference to be more international and bridge the traditions of different mathematical communities.

Krasnoyarsk is a more than 1 million population city situated in the heart of Siberia with wonderful color of Siberian nature. Mathematical department of the city's biggest university, Siberian Federal University (SFU) is one of the Russian leading centers in complex analysis.

Program of the conferences is expected to cover a majority of topics concerning complex analysis, including:

1. Potential theory and quasiconformal mappings
2. Approximation theory
3. Multidimensional residues and integral representations
4. Complex algebraic geometry
5. Tropical geometry and amoeba theory
6. Theory of value distributions and geometric function theory
7. Function spaces and operator theory
8. Complex geometry and complex dynamics
9. Special functions
10. Application of complex analysis

At this moment following speakers confirmed their participant: Alexander Aptekarev (Institute of Applied Mathematics of the Russian Academy of Sciences), Zbigniew Błocki (Jagiellonian University), Evgenii Chirka (Steklov Institute), Jean-Pierre Demailly (Université Grenoble Alpes), Franc Forstnerič (University of Ljubljana), Grigory Mikhalkin (Université de Genève), Stepan Orevkov (Steklov Institute), Armen Sergeev (Steklov Institute), Alain Yger (University of Bordeaux), Xiangyu Zhou (Chinese Academy of Sciences).

Registration will be launched on the base of Siberian Federal University website (<http://conf.sfu-kras.ru/en/27icfidcaa>). All wishing to participate and give a talk are invited to provide abstracts via electronic application form. Information about inclusion of your talk in the schedule of the conference will be send by the program committee through email. The registration fee is 5 000 Russian roubles, which includes reception, participant's kit (case, notebook, pen) and an excursion to "Stolby" nature sanctuary.

The organizing committee provides accommodation for a limited number of participants.

Hope to see you,
Organizing Committee of the 27th ICFIDCAA.
